Answer by letter or QSL-card

PREFACE

"The United Nations Radio Division has followed the development and expansion of the World Radio Handbook through the five years of its existence. It is an indispensable reference book, and one of particular value to all concerned with promoting international understanding through radio, providing as it does an important link between broadcasters and listeners everywhere".

With these words, the Director of the United Nations Radio Division, Mr. Peter Aylen, has expressed The United Nations' appreciation of the World Radio Handbook, its practical purposes and its ideals. I thank Mr. Peter Aylen for this declaration, which exactly describes the motive which prompted the publication of the World Radio Handbook. My endeavour has been to make the contents of each edition as perfect as possible in order that it may fulfil its purpose. But close cooperation with the broadcasting organizations and with listeners is necessary, and an understanding by both sides of the purpose and the value of the World Radio Handbook if the best possible results, as expressed in a message to the World Radio Handbook from Mr. L. Wallenborn, Secretary General of the European Broadcasting Union at Geneva, are to be obtained:

"The European Broadcasting Union (EBU) values every effort to make programmes from any source known to all listeners, whatever their opportunities for listening; hence it cannot but encourage you in your endeavours and hopes that they will meet with the success they so well deserve. If, through the World Radio Handbook, more people come to listen to more programmes broadcast by member organizations of the EBU, there is no doubt that considerable progress will have been made towards the achievement of mutual understanding between the peoples and consequently towards the peace of the world. That is why the Union cannot fail to express the hope that the World Radio Handbook will be widely read in order that it may continue along the path on which it has set its feet, and why it would warmly recommend the book to all those who cherish the same ideals".

I am happy to say that in the past year broadcasting organizations have shown a steadily growing understanding of the value of the World Radio Handbook as a link between broadcasters and listeners. Consequently it is to their own interest regularly to send the World Radio Handbook exact and detailed information about their broadcasting and its development, and to give their support as far as is practically possible. As an example, they may draw the attention of their listeners to the existence of the World Radio Handbook, with a consequent contribution to the promotion of understanding between the peoples of the world. In this connection I would like to express my gratitude to the broadcasting organizations for the support they have already given me, and it is my hope that many of the broadcasting organizations may find it of interest to give the World Radio Handbook their support in such a way that it may be possible to enlarge the contents without raising the price.

I thank the thousands of listeners, users of the World Radio Handbook, who have sent me letters containing criticism and praise. These have been of great value and have been a stimulant to me in my work. I hope that this cooperation may continue and increase to our mutual advantage and pleasure; and I invite listeners in all countries to send me their criticisms and advices and from time to time reports about the results of their listening. I should welcome you as a representative correspondent to the World Radio Handbook and therefore as a contributor to the fulfilment of the purpose of the World Radio Handbook.

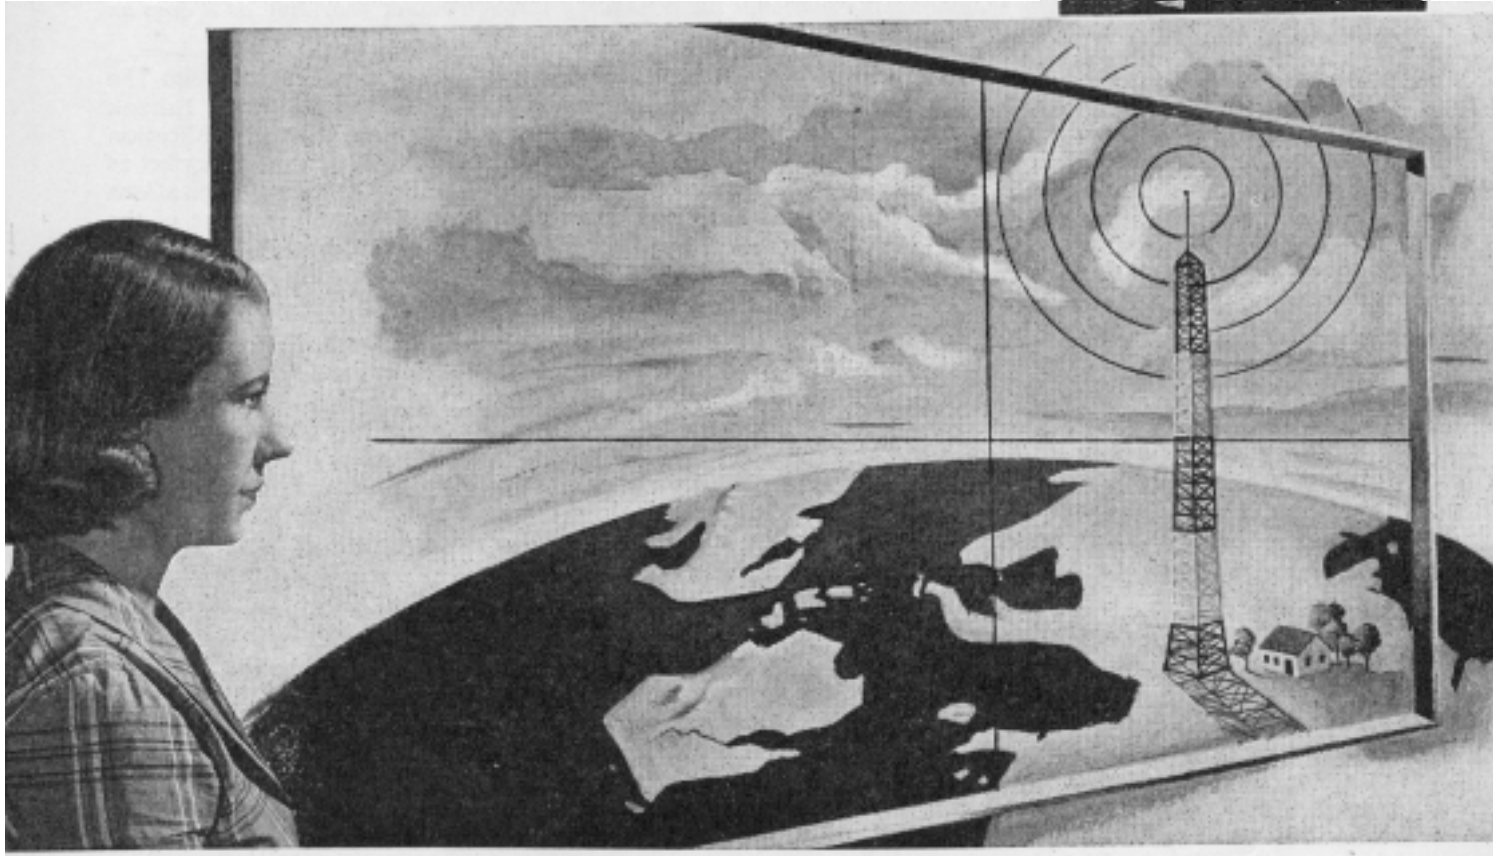

In the present edition of the World Radio Handbook the number of stations is considerably extended and all possible improvements have been made. The table of content gives the names of countries in alphabetical order. In the list of wavelengths the "slogan" used by many stations is indicated, thus making the indication of the stations quicker and less laborious. In all the surveys of the stations the indications of nearly all medium wave stations are added and in the surveys of the Latin-American stations the indications are arranged in another way, so as to make the book easier to use. The list of the Standard-frequency transmissions has been extended and a list of Amateur-Prefixes has been added. I regret that this year it has not been possible to meet *all* the wishes of listeners—but I hope next year to be able to make a further step towards the completeness of the World Radio Handbook.

I am grateful that this year again an opportunity is afforded me in this edition to publish messages from The UNITED NATIONS and from UNESCO. I have to express my thanks to the international broadcasting organizations and the Danish representatives abroad for their kind supports and cooperation.

Copenhagen, November 10th.

O. LUND JOHANSEN

A message from

UNITED NATIONS

A recent estimate gives a round total of 193 million radio receivers and wired loud-speakers in the world, with a probable 600 million listeners, and another 13½ million television sets bringing programmes to an estimated 65 million viewers. Thus, 665 million minds draw at least part of their sustenance from radio and television, 665 million minds which can have a great, perhaps a decisive influence in choosing the direction in which the foreign policy of countries will lead, minds in which the defences of peace can be constructed.

What part can we play then in this supreme effort, those of us who are engaged in radio and television in our own countries and those whose programmes, like those of United Nations Radio, are transmitted internationally?

Every broadcaster has to answer that question for himself. The problems and possibilities of radio services can differ widely from one country to another just as listening tastes and habits vary. What is certain is that no broadcaster conscious of the power for good of the medium he is using can fail to work out his own answers.

As far as United Nations Radio is concerned, we try in preparing the news summaries, magazine programmes and other special features which we provide for rebroadcasting by national networks and local stations to bear in mind these principles.

News of the United Nations and Specialized Agencies and of international events with which they are concerned is given as fully as time allows. Objectivity and accuracy are the most important considerations.

Listeners are looked on as persons who have the right to be informed of what is being said and done in the United Nations and the right as adults to be allowed to form their own opinions on the basis of information given them. From knowledge we believe will come understanding and the will to support the aims and activities of the United Nations and the Specialized Agencies.

United Nations Radio also prepares magazine programmes of talks or interviews by delegates and experts, reportages from United Nations information officers with missions in all parts of the world, and dramatized feature programmes on major themes, such as Human Rights and United Nations Day. In these we strive not only to inform but to catch the imagination of the great numbers of people who have shown their goodwill towards the United Nations and their belief that, as the Secretary-General, Mr. Trygve Lie, said in a recent broadcast: "Today, more than ever, it remains the best, the only, present hope we have for settling the present conflicts by peaceful means around the table and preventing a third world war."

Radio organizations in forty of the sixty member nations rebroadcast on national wavelengths, in almost all cases daily, news programmes provided by United Nations Radio. The more correspondents and the more rebroadcasts there are the better it will be for our joint efforts to see that the incomparable medium of broadcasting is used in the cause of peace.

We now speak to you from our great new home in Manhattan. So, when you see a picture of this United Nations headquarters, think of it not just as a new skyscraper of New York's East River. Think of it rather as the centre, the very heart of a great web of human effort which encompasses the globe, striving by every means in its power to see that man can live with man in dignity and peace.

PETER AYLEN
Director Radio Division

Mr. Jacques Donot, Announcer for the broadcasts to France.

Miss Yung Lena Lee, Announcer for the broadcasts to China.

Mr. Daniel Manjarrez, Announcer for the broadcasts to Latin America.

**DENMARK'S LEADING
DAILY**

INTRODUCTION TO WORLD LISTENING

The practical information given in the following section in respect of the broadcasting services of each individual country includes:

The Addresses of the broadcasting companies in question. Where broadcasts are **commercial**, this is stated.

Names and Titles of the leading personalities in each company.

List of Stations operated by each company with call signs of their transmitters, all frequencies and wavelengths (medium- and shortwaves), as well as their power expressed in kilowatts.

Each short-wave station has its own identification call sign consisting of 3-5 letters or a combination of letters and figures of which the first, or first two, denote the nationality in accordance with the international list of station prefixes. Some short-wave stations, the American for example, use these call-signs when announcing themselves.

Long and medium wave stations are divided into three categories, viz. (1) *Main Stations*, which are so powerful that they can generally be heard throughout the whole area of the country in question, and from which most of the broadcasts emanate; (2) *Regional Stations*, which can be heard only within a certain area of the country, and whose broadcasts consist partly of re-transmissions of the programmes of the main stations and partly of their own programmes; (3) *Relay Stations*, which solely re-transmit main station programmes. These relay stations are the weakest, and are local stations which can be heard only within a limited area.

Most short wave stations use directional aerials, i.e. their broadcasts are directed toward particular areas, and these give the names to the various services: European Service, Near Eastern, Middle Eastern, Far Eastern, Pacific, Latin-American, Caribbean Service, etc. Language and frequency employed vary according to the area to which broadcasts are directed.

Times are shown on pp. 17-102 on the 24 hours system. In this system midnight is 00.00 hrs., 3 am: 03.00 hrs., 10 am: 10.00 hrs. and midday 12.00 hrs. Instead of starting again at 1 o'clock, as the 12-hour system does, the 24-hour system continues to increase the number of each hour until 23.59 (11.59 pm.) is reached. Thus 13 hrs. is 1 pm., 17.00 hrs. 5 pm. and so on. The great advantage of the system is that it eliminates any possible confusion between times a.m. and times p.m.

Frequency and Wavelength.

Frequency and Wavelength are divided into the following groups:

Long waves with frequencies from 133 kc/s (1961 metres) to 500 kc/s (600 metres).

Medium waves with frequencies from 500 kc/s (600 metres) to 3000 kc/s (100 metres).

Short waves with frequencies from 3000 kc/s (100 metres) to 30000 kc/s (10 metres).

The wavelength of a station is measured in metres, a metre being approximately $1\frac{1}{10}$ yards. The wavelength is the distance in metres between the crests of any two consecutive waves. For every wavelength there is a corresponding frequency, which is the number of complete waves, or cycles, sent out by a station in every second. A kilocycle is 1000 cycles; a megacycle 1,000,000 cycles.

Shortwave broadcasting takes place mainly on the following metre bands (m.b.):

49 metre band - 41 metre band - 31 metre band - 25 metre band - 19 metre band - 16 metre band - 13 metre band and 11 metre band.

Many short-wave stations lie outside these bands. The 60 and 80 metre bands are used for local broadcasting, i.e. for reception over relatively short distances, which applies, for example, to many South and Central American stations and stations in Central Africa.

The property possessed by the short waves of spanning great distances with strong signals has encouraged the countries of the world to make use of them for broadcasting purposes.

A careful examination of the behaviour of the various bands and their propagation characteristics has supplied engineers with invaluable information as to the most suitable frequencies for different times of the day or months of the year, so that they can ensure maximum reception at any time in any part of the world in which they may be specifically interested (see table page 103).

The British Broadcasting Corporation (BBC), The Voice of America (U.S.A.), Canada, France, the Soviet Union, and many other large countries maintain comprehensive and extensive short-wave services for the benefit of listeners all over the world.

In the following pages you will find a large variety of call-signs and frequencies. In many cases these belong to the same transmitters which are connected to different aerials designed to radiate signals to the best advantage in respect of each service. The various call-signs serve to identify individual transmissions and frequencies.

Many programmes are broadcast simultaneously from several transmitters on different frequencies, which enables you to select the one which is the most clearly audible in your area or on your particular receiver. If reception on one of the frequencies used is poor, you should examine reception conditions on the other frequencies employed by the same station.

Daily Programmes: Under this heading you will find information concerning the total broadcasting hours on the different frequencies employed during transmission hours, as well as a survey of the news and the more important regular feature programmes on specific days.

Announcements:

The language alone is not a conclusive indication of the origin of a broadcast to which you may be

listening. Hearing a programme in French or Spanish, for instance, does not necessarily mean that it is transmitted by a French or Spanish station respectively. To make sure of identifying a station correctly, it is, therefore, essential to wait for the announcement which every station broadcasts at regular intervals. These call signs are given in this book for practically all the stations listed.

Interval-Signals:

For identifying stations it is also of importance to know the signals used during the intervals between programme items. Under each station you will, therefore, find an indication of the type of signal used, and in many cases also a reproduction of the musical notes of this signal.

QSL Cards:

As indicated in the survey of the broadcasting services of the various countries, many of the stations listed are interested in receiving reports from listeners in respect of their transmissions. These stations acknowledge such reports by sending listeners a QSL (verification) card or a letter. For most of these stations it is stated whether reports are answered by QSL-card or letter.

Many short-wave listeners make a hobby of collecting these QSL-cards which are often elaborately designed and colourful, sometimes with pictures of the station and its location, photos of the personnel, and other interesting particulars.

Reports from Listeners:

Listeners' reports can in most cases be written in English, but Spanish is preferable when writing to South or Central American stations. Each report should contain information as to wavelength, date, time, program heard, intelligibility, strength of reception and whether there was any fading, i.e. variable strengths (QSB), interference from another station (QRM), and static, i.e. atmospheric interference (QRN). – In the case of an amateur transmitter, the report should also contain the call letters of the station.

Moreover, it is helpful to add details of your own location, as well as of the type of receiver and aerial used for listening. If reply postage is requested by a station, enclose with your reports an International Reply Coupon obtainable at most post offices.

Greenwich Mean Time (G. M. T.) should be used for all time indications. – The full address of each station will be found in the individual surveys for each country

Intelligibility	Strength	Interference
QRK1 – unintelligible	QSA1 – unreadable	QRM – interference from another station
QRK2 – partly unintelligible	QSA2 – weak	QRN – atmospheric interference (static)
QRK3 – intelligible with difficulty	QSA3 – fairly good	QSB – variable strengths (fading)
QRK4 – quite intelligible	QSA4 – good	
QRK5 – easily intelligible	QSA5 – very good	

Future Plans:

Many stations have made known their development plans for the immediate future. These include: – Increase of power, new transmitters, etc.

Lists of Long, Medium and Short Wave Stations:

A complete list of the world's broadcasting stations, arranged in order of frequencies (pages 104–117).

Local Time Conversion:

On page 119 you will find a Local Time Conversion Table which gives the local times (summer and winter) in most parts of the world in relation to Greenwich Mean Time (G.M.T.). For example, from September to May it is 15.00 hours New York time when it is 20.00 hours G.M.T., since the table indicates that local time in New York is 5 hours ahead of G.M.T. From May to September U.S.A. introduces day-light saving time and, consequently, it is 16.00 hours New York time when it is 20.00 hours G.M.T.

How to tune in your favourite short-wave station:

It requires some practice to adjust receivers correctly to a short-wave station. A movement to either side by a mere hair's breadth may give the correct adjustment. Once the station has been found, it must be finely adjusted by gently turning the dial knob backwards and forwards, simultaneously increasing the volume until the station in question can be heard distinctly, and identified. If the tuning knob is turned too quickly, a weak station may easily be passed over.

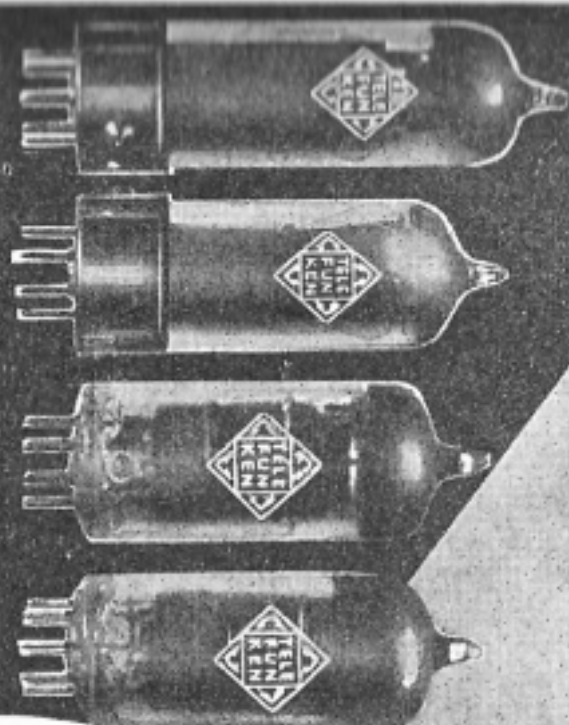

Reception conditions for short waves can be very capricious. After listening to a far-distant station for a short time, it may suddenly disappear completely (fade) and not return immediately.

Some broadcasts are often transmitted on several wavelengths simultaneously. If after adjusting your receiver to the station to which you wish to listen, you find reception unsatisfactory, try the other wavelengths used by the same station during the period in question.

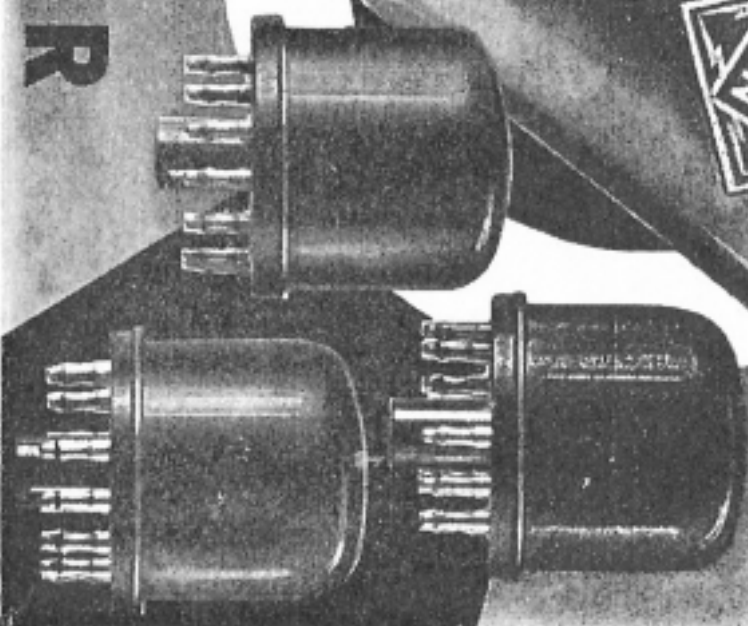

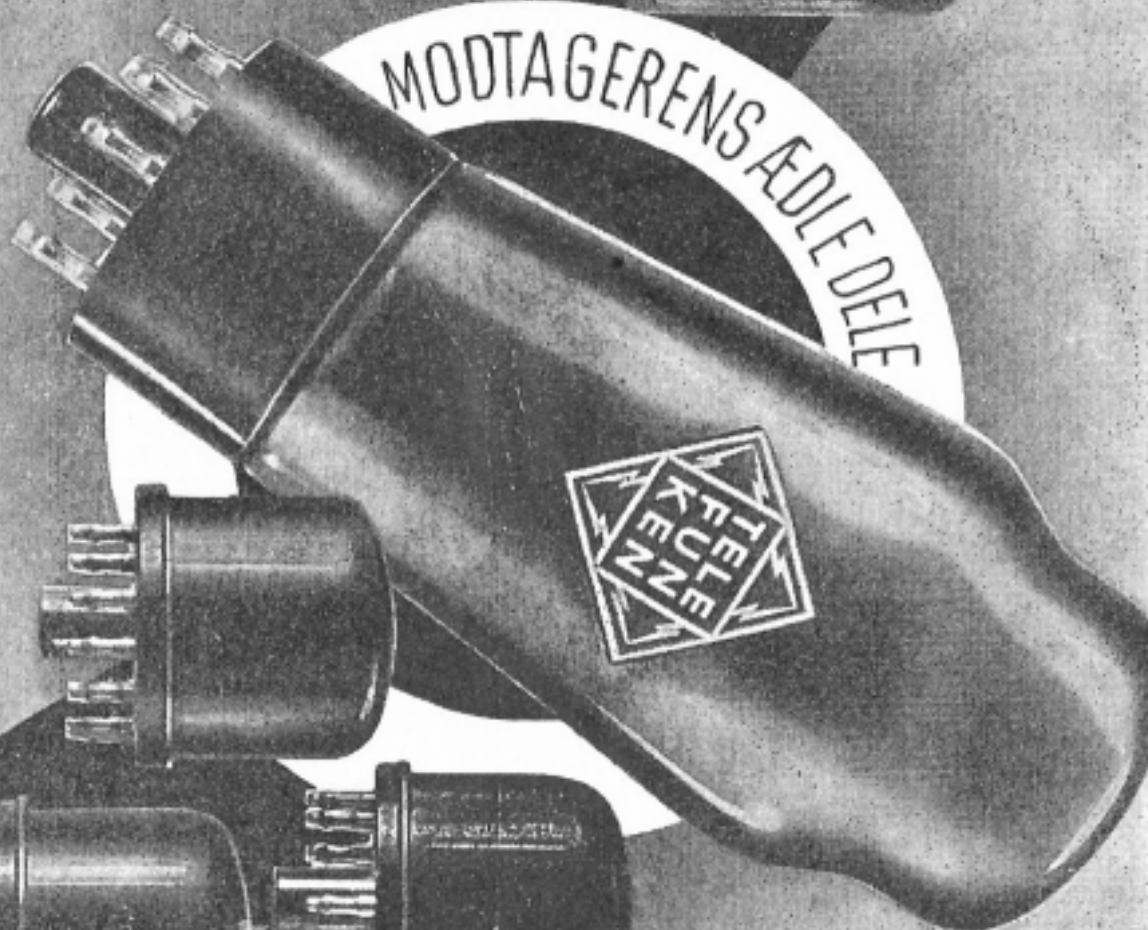

How to identify a short-wave station:

Whenever you come across a station which is unknown to you, proceed as follows for identification: Read the approximate frequency indicated on your dial in megacycles or kilocycles or the wavelength in metres. Find from the table of frequencies and wavelengths what stations are working in the neighbourhood of the reading shown by your dial. When you have reduced the source of the broadcast to one or two possibilities and at the same time noted details of the program heard and the language used, check these data against the program surveys printed in this Handbook. For confirmation it is advisable to wait for the station announcement or interval signal mentioned previously.

One of the most important activities of the United Nations Educational, Scientific and Cultural Organization is that of improving international understanding by promoting the greatest possible flow of information between peoples. This is the task of the Mass Communication Department of Unesco which works through the media of Press, Film and Radio. The Radio Division of the Department of Mass Communication has forged ahead in the last year by an increased output of recorded programmes and scripted material in many languages. The regular weekly radio bulletin "The Unesco World Review" is now distributed to over one hundred countries and territories.

In the field of recordings, over 4,000 copies of talk, special reports, round-table discussions and special radio features have been sent to some 70 countries, as far apart as Pakistan and Venezuela, Holland and New Zealand; to countries as large as the Americas and as small as Haiti. The main new development during the last year has been in the direction of special radio feature programmes which cover such subjects as Unesco and Human Rights, the International Voluntary Work Camp Movement, Schools for Refugee Children, the Unesco Folk Music Album, Collective Security, United Nations Day, Fundamental Education, and the Scientific Facts of Race.

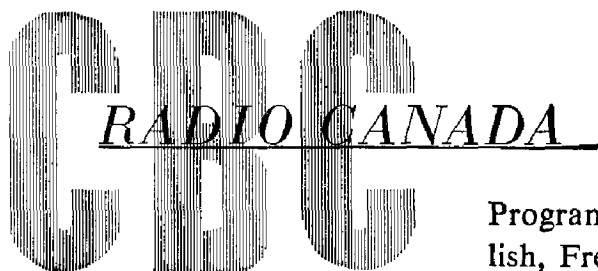

The increasing demand for this type of programme has made it necessary to construct a second Production Studio in Unesco House. With these new facilities, feature programmes are now being produced in English, French, Spanish, German and Dutch.

From the broadcasting point of view, there is increasing evidence that production managers in many parts of the world are more than satisfied with the quality and interests of these programmes and in many places have in consequence started regular Unesco sessions which incorporate these recordings.

The advantageous position of the Unesco Radio Division is that it can see human problems from an international point of view and in many ways supply radio stations with information and recordings of famous people who are seldom available to the production staff of local stations. By engaging in this work, the radio Division is playing a big part in carrying out the ideals of Unesco and the United Nations by building international understanding through the free exchange of information and ideas.

GORDON FRASER

Head, Radio Division, Dept. of Mass Communication.

Programs from Canada are broadcast daily to Europe in English, French, Dutch, Czech, Slovak, German, Danish, Norwegian, Swedish, Italian, Finnish and Russian; to the Caribbean and South America in English, Spanish, Portuguese and French and on Saturdays Dutch is heard by listeners in the Caribbean. Every Sunday and Wednesday programs in English are broadcast to the Southwest Pacific.

Listeners in all countries are invited to tune in to Canada's International Service for a day-to-day chronicle of Canadian life and to write requesting a monthly program schedule.

IT is true that modern radio transmission spans the world and has brought continents and countries closer to each other. But it is also true that in a far more concrete sense PHILIPS radio sets span the world, since they are found on all continents and in practically all countries. Philips is one of the pioneers in modern radio reception and transmission, especially on short-waves. As early as 1927 already a Philips experimental transmitter on a wave-length of 30,9

could be clearly received in all corners of the world.

To-day Philips radio transmitters too are serving all over the globe.

Just as important, however, is the fact that Philips contributed much to world entertainment by producing excellent sets for reasonable prices: sets for everybody!

entertainment
is open to you!

PHILIPS

In order to symbolize the contribution of Philips to world entertainment, a colourful world map has been produced (printed in 16 colours) showing most of the world's short wave stations. If you should like to receive a copy of this beautiful map (size 30" x 42") just send a postcard to PHILIPS, General Advertising Division, EINDHOVEN, NETHERLANDS.

Great Britain

British Broadcasting Corporation (BBC): BBC EUROPEAN SERVICE: ENGLISH BY RADIO. - ANN AND HER GRANDFATHER, a fortnightly series of elementary English lessons consisting of short conversations between Grandfather, Mr. Robinson (played by Allan Wheatly) and his grand-daughter, Ann Robinson (Brenda Cleather), whose amusing domestic encounters have made them firm favourites with 'English by Radio' listeners all over Europe. Ann and her Grandfather play a game of chess, Grandfather is rather concerned about Ann's move.

Programs on long and medium waves are relayed by Tromsø short wave transmitter for Norwegian seamen in the North Atlantic and the North Sea:

On 9540 kc/s: Mo.-Fri. 06.15–07.35 (Sat. 08.20), 10.20–13.00 Sun.: 07.55–14.45.

Radio Norway Short Wave Division: Knut Johansen during one of the daily transmissions for Norwegians abroad.

On 7210 kc/s: Weekdays: 15.45 (Sat. 14.30)–22.00. Sun.: 15.15–22.15.

Regional Programs: Bergen II: Weekdays 11.00–11.30. Daily: 16.00–18.00. – **Tromsø and Finnmark in Samisk** on 155, 701 and 7210 kc/s: Tues., Fri. 15.30–15.45.

ON SHORT WAVES:

S=Sundays. W=Weekdays. NAW=North American Waters. NA=North Atlantic. NS=North Sea. FE=Far East. IO=Indian Ocean. AW=African Waters. SA=South Atlantic. S.Am.=South America.

From Oslo and Fredrikstad. Daily:

01.00–02.00 (Sun. 02.15) to NAW, NA in 19, 25, 31 m.b. and 190 m. For Norwegians abroad.

06.15–07.30 (Sun. 07.55–10.50) to AW, SA in 13, 16, 19, 25 m.b. Relay Home Service.

11.00–12.00 (Sun. 12.15) to FE in 13, 19, 25 m.b. For Norwegians abroad.

13.00–14.00 (Sun. 14.15) to IO in 13, 16, 19, 25 m.b. For Norwegians abroad.

18.00 (Sat. 17.00, Sun. 15.00)–19.00 to AW, SA in 13, 16, 19, 25 m.b. Relay Home Service.

19.00–20.00 (Sun. 20.15) to AW, SA in 13, 19, 29, 31 m.b. For Norwegians abroad.

20.00 (Sun. 20.15)–22.00 to AW, SA in 13, 19, 25, 31, m.b. Relay Home Service.

23.00–24.00 (Sun. 00.15) to S.Am, S.A. in 19, 25, 31 m.b. and 190 m. For Norwegians abroad.

Every transmission to Norwegians abroad consists of: News, Local News, Talk and Music. The last 15 minutes consists of Norwegian music or music by Norwegian artists. This section is announced in both English and Norwegian.

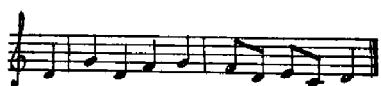

"Norway this week" in English: Sun: 12.00, 14.00, 20.00, 24.00 and Mo. 02.00–02.15.

Every Saturday (and sometimes Wedn.) a "Letter-Box" program is broadcast in Norwegian and English (the last 1/2 hour of the broadcast), in which listener's letters are answered and their musical requests are honoured.

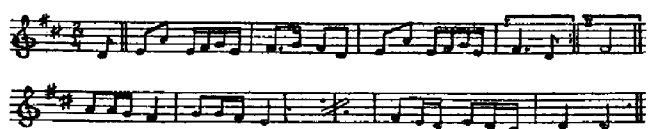

Announcements: Mediumwaves: "Dette er Norsk Rikskringkasting". – Shortwaves: "This is Radio Norway with its shortwave service for Norwegian abroad". In *Samisk*: "Dat la Norga Rikaradio, Tromsast. Di gullabetet Samgiel programa".

Poland

Interval Signal: For all long- and mediumwaves:

Every shortwave-transmission to Norwegians abroad is introduced by a Norwegian folk melody from Hallingdal:

At opening and close down: Choir (Norwegian music).

Message to Listeners: Reports are answered by QSL-cards — and by radio Saturday evening in the English-Norwegian "letter-box" feature program.

Future plans: A 200 kW long-wave transmitter near Oslo under construction.

POLAND

Address: Komitet do Spraw Radiofonii "Polskie Radio", Noakowskiego 20, Warsaw. — **Cable:** Polskie Radio Warsaw.

Leading Personalities: For the leading of the Broadcast a leading Committee was formed October 1st 1951. Leading Personalities of the Committee are to be fixed later.

Widney-DORLEC

CABINET SYSTEM

The Widney-Dorlec Cabinet System consists of a series of prefabricated diecast corners, extruded sections and various other components which enable modern fully radiused cabinets, etc., etc., to be built without special tools.

Widney TELESCOPIC MOUNTINGS

Telescopic Mountings offer the most convenient means of obtaining complete accessibility of rack mounted equipment as each chassis can be withdrawn completely clear of its framework for easy examination.

The Belgian National Broadcasting Institute; the International Goodwill in Leopoldville, Belgian Congo”. — *Spanish:* “Aqui Leopoldville, La Voz de la Concordia”.

Interval-Signal: Native xylophone.

Message to Listeners: OTC welcomes reports from all listeners. They are answered by QSL-card and on the air in the feature “Amongst Friends”, which is the forum of the OTC-Amongst Friends Club. This Club was formed two years ago following the suggestion of many regular listeners, in order to provide closer contact between the station and its listeners on one side, and between listeners themselves on the other through the pen-pal section. The club has also a stamp-collectors corner. “Amongst Friends” aims at creating a better understanding between all nations and peoples of the world and at promoting international goodwill. It is a non-profit organization, and membership tokens are forwarded to those who send either one dollar (USA) or 13 international Reply Coupons.

 m. b. (during June to October in 25 m. b.)

Announcements: "This is Radio Australia Calling" or
 "This is Radio Australia transmitting the Overseas Ser-
 vice of the Australian Broadcasting Commission".

Tuning and Interval Signal: Music box playing "Waltzing
 Mathilda" for five minutes preceding transmissions.
 Transmissions commence with clock chimes and the
 laugh of the Kookaburra. Gongs are used as programme
 cues only. "Waltzing Mathilda" in March tempo pre-
 cedees and concludes all News Bulletins. Indonesian
 transmissions open with "Waltzing Mathilda" played on
 piano-accordion with instrumental ensemble. Thai trans-
 missions open with "The People's Song" and conclude
 with the Thai National Anthem.

Verification by QSL-card. A 20 page Programme Guide
 is published quarterly and issued free of charge.

Message to Listeners —

Believing in the fundamental principal that freedom can only be obtained by truth and righteousness, the stations of the Far East Broadcasting Company are pledged to a campaign for freedom based on the teachings and principles of the Lord Jesus Christ. He said: “You shall know the truth and the truth shall make you free” and again “I am the truth”. For messages of peace to world at war, messages of hope for the hopeless, messages of freedom to a world enslaved by sin and darkness, listen for “The Call of the Orient”.

RELAY STATIONS

For shortwave frequencies of the relay stations, refer to the individual countries: Germany, Greece, Gt. Britain, Tangier, Hawaii, Philippines.

Announcement:

Each program ends with the words: "This program has come to you from the United States of America", in the language of the program.

Interval-Signal: The tune "Yankee Doodle".

Verification by QSL-cards.

STANDARD FREQUENCY STATIONS

JJY Station, Radio Regulatory Commission (RRC)
 Tokyo, Japan.

Address: Koganei-branch, Standard Frequency Section,
 Engineering and Monitoring Division, Radio Regulatory
 Commission (RRC), Koganeimachi, Kitatama-yun,
 Stations: 2 kW 4000 kc/s 75 m 24 hours - 8000 kc/s
 37.50 m 21.00-11.00.

Services: 1. Standard radio and audio frequencies. 2.
 Standard time signals. 3. Radio propagation disturbance
 warning.

1. Any desired radio frequencies, incl. microwave frequ-
 encies, may be accurately measured. The standard audio-
 tone, 1000 cycles/s, is continuously superimposed on the
 carrier by modulation during nine minutes from the hour
 and every successive ten minute. Useful for accurate fre-
 quency measurement or calibration of frequencies or as
 a short time interval.

2. *Second Signal*: The waves are interrupted during 20
 milliseconds every second. *Minute-Signal*: The waves are
 interrupted during 200 milliseconds every minute.

3. A notice of radio propagation condition is broadcast
 in code "W" or "U". If a warning in effect, the code "W"
 is repeated 8 times before the call sign. If unstable con-
 ditions are expected the code "U" is repeated 8 times.

Message to Listeners: RRC welcomes reports on recep-
 tion or method of use. Correspondance should be address-
 ed: Standard Frequency Section, Engineering and Mono-
 toring Division, RRC, Aoyama, Minato-ku, Tokyo,

RADIO STATIONS WWV and WWVH

Addresses: 1. Radio Station WWV, National Bureau of
 Standards, Washington. 2. Radio Station WWVH, Pu-
 unene, Maui, Hawaii.

Stations: *WWV*. broadcast night and day standard fre-
 quency, time signals on 2500 (0.7 kW), 5000 (8 kW),
 10000 (9 kW), 15000 (9 kW), 20000 (8.5 kW), 25000
 (0.1 kW), 30000 (0.1 kW), 35000 (0.1 kW). - *WWVH*.
 broadcasts standard frequency, time signals on 5000 (0.4
 kW), 10000 (0.4 kW), 15000 (0.4 kW) continuously exc.
 from 07.00-07.40 and 19.00-19.40 and four minutes after
 the hour and half hour. Time, tone and frequency same
 as WWV.

Other Services: WWV (not 30000 and 35000 kc/s) broad-
 casts disturbance warning at 19 and 49 minutes past the
 hour; W=warning six times, U=unstable conditions six
 times; N=normal conditions, eight times.

Audio Frequencies and Musical Pitch: 600 cycle tone
 first four minutes, one minute announcements, 440-cycle
 tone next four minutes, one minute announcements; re-
 peat every ten minutes.

Message to Listeners: WWV answers reports by QSL-
 card or letter. WWVH answers by letter.

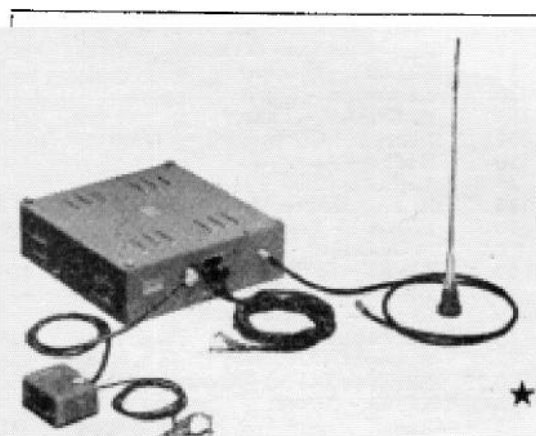

TABLE OF THE MOST SUITABLE METRE BANDS FOR BEST SHORT-WAVE RECEPTION IN EVERY PART OF THE WORLD AT VARIOUS TIMES OF THE DAY THROUGHOUT THE YEAR.

This Table provides a ready answer to the question: Which is the best waveband for listening to a certain country at a particular time of the day during any one of the four seasons of the year?

The listener's area M—Morning A—Afternoon E—Evening		Area of the station required

THE SHORT WAVE NEWS AND RADIO AMATEUR

will keep you up to date with all that is going on in the world of amateur radio. Each issue contains the latest information on S. W. broadcast, amateur transmitting and V. H. F. activities. Topical features and constructional articles make this monthly magazine one which is of interest to every S. W. radio enthusiast. 1s. 6d. monthly. Annual sub 2ls.

THE RADIO CONSTRUCTOR

is the monthly magazine for the practical radio enthusiast. With an emphasis on construction, all types of radio, receivers, televisions, amplifiers, recording equipment, test gear, radio control of models, workshop practice etc., are covered in this journal. The home constructor of all types of electronic gear will find this periodical invaluable. 1s. 6d. monthly annual subscription 18s.

Sample copies sent on request.

AMALGAMATED SHORT WAVE PRESS LTD.
57, Maida Vale, London, W. 9.

International Allocation of Call Signs

The following table of prefixes was revised at the Atlantic City Conference 1947, and came into use in 1949. The first character or the first two characters of a call sign indicates the nationality of the station using it.

AAA-ALZ U.S.A.	HCA-HDZ Ecuador	XYA-XZZ Burma	PKA-POZ Netherlands Indies
AMA-AOZ (Not Allocated)	HEA-HEZ Switzerland	YAA-YAZ Afghanistan	PPA-PYZ Brazil
APA-ASZ Pakistan	HFA-HFZ Poland	XBA-YHZ Netherlands Indies	PZA-PZZ Surinam
ATA-AWZ India	HGA-HGZ Hungary	YIA-YIZ Iraq	QAA-QZZ (Serv. Abbreviations)
AXA-AXZ Australia	RAA-RZZ U.S.S.R.	YJA-YJZ New Hebrides	YNA-YNZ Nicaragua
AYA-AZZ Argentina	SAA-SMZ Sweden	YKA-YKZ Syria	YOA-YRZ Rumania
BAA-BZZ China	SNA-SRZ Poland	YLA-YLZ Latvia	YSA-YSZ Salvador

		PJA-PJZ Curacao	8AA-9ZZ (Not Allocated)

A NEW WORLD WIDE REFERENCE BOOK:

WORLD RADIO VALVE HANDBOOK

gives the radio engineer and the radio technician at a glance the correct answer to any practical question concerned with receiving and amplifying valves of any makes:

- Replacement or substitute valves wherever there are suitable types.
- Classifies valves of all kinds of the basis of their electrical data.
- Provides full information about base and pin connections.

RECEIVING VALVES OF THE
WORLD, THEIR DATA, USES
AND INTERCHANGEABILITY
AT A GLANCE

Price: 11/6 d or \$ 1,75 plus postage or the equivalent in local currency. Obtainable from the distributor of the World Radio Handbook, 1, Lindorffsallé, Hellerup, Denmark.

Write for pamphlet and further particulars.

WIRELESS WORLD is Britain's leading technical magazine in the general field of radio, television and electronics. Founded over 46 years ago, it provides a complete and accurate survey of the newest British technique in design and manufacture. Articles of a high technical standard cover every phase of the radio and allied industries, whilst critical reviews of the latest commercial equipment, broadcast receivers and components of all types are regularly included. Theoretical articles by recognised experts deal with design data and circuits for every application. "Wireless World" is indispensable to all manufacturers and technicians and is read in all parts of the world. *PUBLISHED MONTHLY 2s.*

Annual Subscription £ 1.7.0. U.S.A. \$ 4.50. Canada. \$ 4.00.

Wireless World

DORSET HOUSE, STAMFORD ST., LONDON, S.E.1.

THE WORLD'S LEADING JOURNAL ON RADIO & TELEVISION

built to TUNE IN THE WORLD!

In 2 Easy Steps...

1 Flip on crystal CALIBRATION OSCILLATOR. Continuous tone signals will be heard at exact 500 kc intervals from 2000 kc through 56000 kc.

YOU'RE THEN "ON FREQUENCY" WITH PIN-POINT ACCURACY. IF DESIRED STATION IS THERE TO BE HEARD—YOU'LL BRING IT IN!

2 Use RESET CONTROL to adjust dial pointer. Coincide with exact frequency of this test signal.

**"The GLOBEMASTER"
SX-62**

The only Radio with all these features

- High-fidelity reception on all wave bands—Standard Broadcast, FM and Short Wave.
- World-wide frequency range, with continuous coverage from 540 kc through 110 Mc, AM or FM!
- Flexibility of control, with six degrees of selectivity, separate sensitivity and volume controls, plus automatic noise limiter and beat frequency oscillator.
- Ease of tuning with hair-line accuracy. Six broad scales with over 150 stations marked; calibration oscillator for checking frequency as explained above.

There's a Precision Hallicrafters
for you from \$44⁵⁰
to \$289⁵⁰
